Briktra QA Summary

Enterprise Quality Gate Summary

Document Version 1.0.0 · 2026-08-10

Briktra Construction Management Platform

1. Executive Summary

Complete role-based regression against the Briktra Flow Sheet on PROD is finished. Tenant smoke is conditionally acceptable; Manager, Supervisor, and Employee releases are blocked by critical permission and session-security defects. Deep Flow Sheet CRUD remains pending after RBAC hardening.

2. Overall QA Status

Authentication (all roles)

PASS (login); FAIL (token revoke)

Tenant module smoke

PASS (15/15 routes)

RBAC restricted surfaces

FAIL (Manager / Supervisor / Employee)

Field workflows (Sup/Emp projects)

FAIL (zero assignments)

Release readiness

NO GO

3. Testing Scope & Environment

- UI: <https://briktra.com/app/index.html>
- API: AWS API Gateway /prod (ap-south-1)
- Flow Sheet: 542 elements / 69 pages
- Method: Playwright + PROD API; issues under docs/qa-*-regression/github-issues/
- Browsers/Devices: Chromium headless 1280x800; mobile GPS attendance pending

4. Roles Tested

7. Go / No-Go Recommendation

NO GO

Do not deploy a production role expansion or market the field apps as RBAC-complete until P0 permission leaks and logout token revoke are fixed and retested.

8. Testing Timeline

- 2026-08-10
Tenant PROD regression + issue triage
- 2026-08-10
Manager PROD regression
- 2026-08-10
Supervisor PROD regression
- 2026-08-10
Employee PROD regression
- 2026-08-10
Enterprise consolidation package

9. Release Readiness

See Briktra_Release_Readiness_Report.pdf. Blocking: RBAC P0 cluster + JWT logout + assignment gaps.

10. Revision History
